**[www.esaote.com](http://www.esaote.com)**

At Esaote we believe technology is not truly state-of-the-art unless it serves real world needs. We understand the demands of today's clinical environments, and continue to develop MRI and ultrasound systems that are user-friendly and patient-friendly, ergonomic and affordable.

As part of the international Esaote Group, Esaote Canada has the support of one of the world's leading medical imaging companies to continue to develop innovative medical imaging systems, incorporating the latest technological advances.

**[www.emovi.ca](http://www.emovi.ca)**

Emovi's technologies and AI solutions address clinical challenges that exist through the continuum of care for patients with knee pain and pathology. These challenges include patient engagement, pre-operative planning, digital and robotic surgery, post-operative assessment, and outcomes measurement. Our mission is to transform the musculoskeletal health care landscape to better facilitate efficient and effective medical care pathways that promote active, healthy lifestyles for all patient populations. In partnership with the Quebec University research community, including the CRCHUM, Ecole de Technologie supérieure (ETS), and TELUQ, Emovi completed the development of the KneeKGTm, an FDA 510K cleared, Health Canada licensed and CE Marked medical devices appropriate for assessing the 3D motion of the knee for patients who have impaired movement functions of an orthopedic cause. The technique is described as a Knee Kinesiology exam.
